

Voluntary Carbon Standard 2007
Validation Report Template

19 November 2007

Additional Validation Report:

Name of Verification company:	Date of the issue:
TÜV NORD CERT GmbH	17 July 2009
Report Title:	Approved by:
Additional Validation Report of Guangdong Nan Ao 26MW Wind Power Project	Mr. Eric Krupp
Client:	Project Title:
Climate Bridge Ltd.	Guangdong Nan Ao 26MW Wind Power Project
Summary:	
Climate Bridge Ltd. has commissioned the TÜV NORD JI/CDM Certification Program to carry out the validation of the project, Guangdong Nan Ao 26MW Wind Power Project, with regard to the relevant requirements of VCS 2007 .1Standard. TÜV NORD has validated and hereby confirms the following 5 additional requirements; the following items and their numbering (1.1.2, 1.1.3, 1.1.4, 8.1, and 8.2) refer to the VCS Project Description Template. 1.12 Demonstration to confirm that the project was not implemented to create GHG emissions primarily for the purpose of its subsequent removal or destruction. The project is a wind power project, which does not create GHG emission. 1.1.3 Demonstration that the project has not created another form of environmental credit (for example renewable energy certificates). The project only creates CDM credit (for period after CDM registration) and VCS credit (for period before CDM registration). No other form of environment credit is involved. 1.1.4 Project rejected under other GHG programs (if applicable): The project has only applied for CDM support and has been registered on 15th Dec.	

2008; it has not been rejected under other GHG programs.

8.1 Proof of Title:

The owner of the project is China Resources Wind Power (Shantou) Co. Ltd and it has the ownership of reductions from the project, which is evidenced by LOA ,ERPA and business license.

8.2 Projects that reduce GHG emissions from activities that participate in an emissions trading program (if applicable):

The project was only registered under CDM. The emission reduction after CDM registration date will be accounted as CER and the emission reduction before CDM registration date will be accounted as VCU. Namely, no any single emission reduction will be counted in two different GHG Programs at the same time (double counted).
